The seminar focuses on the trilateral encounter between Germans, Israelis and Palestinians. Within this conflict triangle, the mixture of unresolved trauma, collective narratives and entrenched politics has resulted in an almost impenetrable tangle of destructive dynamics. Using interactive and creative approaches that pay special attention to personal perception, we will make visible narratives and psychological and political patterns that disrupt and prevent interpersonal and communal empathy. In 9 days together, we will focus on the processes within us that portray the "other" as a stranger and enemy, thereby creating opportunities for personal and social transformation.

Friendship Across Borders (FAB) e.V. seeks to create mutual understanding of Germans, Palestinians and Israelis and each other's individual and collective trauma. With our work we strive to assist the transformation of the Palestinian-Israeli conflict at the grassroots level, forming connections that reach beyond the borders of territory, narrative and identity, so that we and future generations can live in freedom, peace, dignity and security.
